EMERGENCY MEDICAL TECHNICIAN BASIC CERTIFICATE (EMT.BASIC)

This certificate prepares students for the EMT-B State Licensure Test. The extensive curriculum includes medical aspects, legal terminology, pharmacology, childbirth, and life saving techniques, such as CPR. The EMT candidate will participate in hands-on training in clinical and practical applications in hospital settings and field time, such as auto extrications. Testing is done periodically in the classroom, as well as practical settings.

The Emergency Medical Technician Basic Certificate has [specific admission requirements](#).
